Sequin design is ready!

Note: Sequin tool and Sequin fill are separate options. *Import Artwork requires Vector pack, which is an option to Illustrator and Artist Plus levels. Check with your distributor for further details.

A beautiful way to embellish garments, Sequins are soaring in popularity worldwide

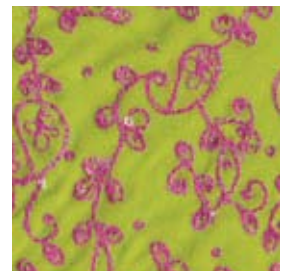

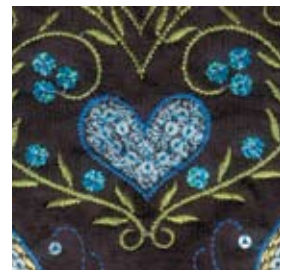

PULSE'S SEQUIN FEATURE IS EASY TO USE

The rapid growth of sequin wearables has created the need for faster, better sequin design creation. Only Tajima DG/ML by Pulse offers a full suite of sequin tools to help you create dazzling designs with speed and ease.

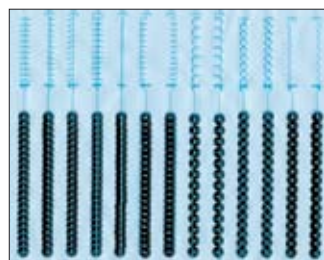

Creating sequin designs has never been easier. Simply Draw or Import Artwork* and convert it to sequin. The Sequin tool allows you to digitize for sequin as easily as you would for a running stitch.

Gone are the days where you had to digitize sequins manually. With the automated Sequin tool, you can choose from over 12 different sequin styles. A variety of settings determine the size of sequin, the style for tack down and the overlap between adjacent sequins. You have complete control over your design- changing styles, spacing, or even the size of sequin is quick and easy to do. Commands to activate the sequin attachment and jump commands are automatically added.

If you want to add sequin to your embroidery business, Tajima DG/ML by Pulse's Sequin Option is a must-have tool.

The mixing of sequins and embroidery allows for the creation of intricate and artistic effects.

Choose from over 12 different sequin styles to create dazzling designs.
